

Everhart Eye Associates

Everhart Eye Associates has successfully treated thousands of patients. We've improved peoples' eyesight, increased their comfort and enhanced their lives. In every case, we've aimed at providing the best possible eye care tailored to each patient's unique medical needs.

We've done this by:

Using state-of-the-art technology to diagnosis and to treat eye conditions.

Drawing on Dr. Suzanne Everhart's 20 years of experience as a board certified comprehensive eye physician and surgeon.

Relying on expertise gained through medical school and residency training as well as a personal, passionate commitment to ongoing professional education and involvement in medical organizations.

Striving for excellence with every patient every time with a blend of skill, knowledge and compassionate care.

Dr. Suzanne M. Everhart

Dr. Suzanne Everhart is a comprehensive eye physician and surgeon with 20 years experience in helping patients with their vision needs. She is board certified in Ophthalmology.

Dr. Everhart is a graduate of the Texas College of Osteopathic Medicine. There, she received the Hoecht-Roussel Award for Clinical Excellence in Surgery. Following completion of medical school, she did her residency at Tulsa Regional Medical Center in Tulsa, Okla. At that time, she received

extensive training in cataract, glaucoma, eye trauma, plastic surgery of the eyelids and retinal disorders. She was trained in the use of state-of-the-art techniques and technology in the treatment of these disorders. The technology was so new that she trained several established eye surgeons in both Virginia Beach and Richmond in its use.

Following her residency, Dr. Everhart practiced in Virginia Beach and assisted in the training of ophthalmology residents at Eastern Virginia Medical School. In 1994, she established her own practice, Everhart Eye Associates, in Ashland, Va.

EVERHART EYE ASSOCIATES P.C.

Excellent eye care. Exceptional results. Extraordinary service.

Life.

In focus.

Refractive Lens Exchange

Standard Lens

Improved image quality.

This lens corrects vision for *distance only*. Glasses are needed for residual astigmatism and reading.

Multifocal Lens

See the big picture and the details.

Imagine reading, shopping, dining, and sightseeing all without the aid of glasses. With the breakthrough multifocal lens, four out of five patients in the supporting clinical study reported never needing to wear glasses after surgery in both eyes. It's the lens for qualifying patients who want today's *most advanced option*.

Toric Lens

Corrects preexisting astigmatism.

If you have astigmatism and are concerned primarily with *improving your distance vision*, this lens eliminates the need to have two corrective procedures. It provides improved quality distance vision and decreases the dependency on glasses as compared to traditional lenses.

Refractive Lens Exchange

Everhart Eye Associates is dedicated to using modern medical breakthroughs to benefit patients. An excellent example of this is refractive lens exchange (RLE). This procedure is an impressive advance in surgical techniques and technology. RLE is used to address astigmatism, the need for bifocals and near and far sightedness.

During RLE, a surgeon uses small, sophisticated instruments to remove the eye's natural, clear lens. This is replaced with an artificial one, typically made of plastic, silicone or acrylic material. Depending on the patient's eye condition and the

type of lens used, individuals may enjoy enhanced vision at short and long ranges, better image quality and contrast, and less – or no – need for eye glasses. Patients who have RLE surgery will not develop cataracts because their natural lens has been removed.

RLE is not appropriate for everyone. Therefore, Everhart Eye Associates carefully examines all patients to determine if they are good candidates for this procedure.

Not only can RLE improve patients' eyesight, it also can enhance their quality of life. After

surgery, many patients discover they can return to the vigorous lives they love. Activities like golfing, swimming and tennis become possible again. Plus, many daily tasks become easier. In short, RLE literally can provide a new crisp, clear view of the world – and all it has to offer.

Contact Us

Everhart Eye Associates welcomes new patients. We serve individuals from across Virginia. For an appointment, contact us at **804.752.7508**
